# The Just Trust Solutions Group

*The Just Trust Solutions Group provides a variety of services designed to help simplify your company's operations. Our continually expanding range of services currently includes document and knowledge management, risk consulting, litigation management, claims administration and custom software development.*

**Legacy Risk Consulting** (LRC) works with you to maximize the value of your insurance. With almost two decades of experience in risk management, LRC will provide you with objective information, helping you gain a complete understanding of all possible coverage.

To help you meet your cost management goals, LRC's services include Risk Profiling, Insurance Allocation & Modeling, Coverage Review & Analysis, Cost Sharing Agreements, Coverage-In-Place Agreements, Claims Qualification for Reinsurers

**Special Claims Services** (SCS) focuses on claims administration and resolutions, working to produce outstanding results for its clients. With over a decade of claims handling experience, SCS can act as your liaison with insurance carriers, defense counsel and plaintiff counsel in asbestos, long-term exposure, silica and other toxic tort matters. SCS offers Claims Consulting, Claims Analysis, Data Management and Litigation Management

**Optimal Data Systems** (ODS) offers **Optimum™**, a browser-based document and knowledge management service used in an online environment to provide your organization with efficient access to its documents. ODS offers customized solutions ranging from scanning to disk to web-based retrieval to fully customized systems that can be integrated with your current applications. You will have the ability to edit and track your documents, enabling you to streamline your data and administrative support structure. Optimum™ gives your employees in multiple locations access to documents increasing employee efficiency and allowing client involvement.

**JTS Systems'** development group provides customized end-to-end solutions to support the administration of your company. Our software applications address data collection and validation management, benefit calculation against complex decision matrices, check creation, data interrogation and communications, together with operations reporting, document storage and management, business information and audit controls.

JTS Systems also provides ongoing maintenance, in addition to documentation, operations training and backup technical support.
